quote

representatives of both parties exchanged opinion on key problems of the present-day international situation. it was emphasized that the responsibility for the aggravation of international situation is borne, first of all, by the united states that is trying to impose the policy of diktat in relations with socialist and developing countries, to undermine detente and bring the world back to the times of the cold war.

representatives of the cpsu and the swiss labour party pointed to the importance of a joint rebuff by communist and workers, parties, all progressive and democratic forces to these dangerous designs.

they emphasized the resolve to continue the struggle for detente, against the arms race, for the consolidation of friendship and cooperation among all countries of the european continent.

the conversation passed in the atmosphere of mutual understanding, in the spirit of friendship and cooperation typical of the relations between the cpsu and the swiss labour party.
