 euer nr. 60

uebermittle euch nachstehend das statement von benon sevan  
 vom 7. oktober zu randvermerkter angelegenheit:

quote

"the secretary-general has repeatedly said that he would be prepared to assist the afghans in whatever way they deem it fit. as the afghan problem will eventually have to be solved by the afghans themselves, it is natural that at some point, they will have to get together. in that connection, the secretary-general has expressed his readiness to invite representatives of all segments of the afghan people to a gathering, should such a gathering be acceptable to the afghan people. the secretary-general is keeping close contact with the governments concerned and with the various segments of the afghan people to see how the five elements contained in his statement of 21 may 1991 can be transformed into a reality."
