The human brain is such a complex system that it can only be understood by combining knowledge and practices from multiple scientific fields. The 5th HBP Student Conference provides an open forum for the exchange of new ideas among early career researchers working across various sciences relevant to the Human Brain Project (HBP). Attendees will be exposed to the data-driven brain research approach of the HBP and have the opportunity to use the EBRAINS platform. The conference offers a space for extensive scientific dialogue, both intra- and interdisciplinary, among peers and faculty through a variety of discussion sessions, lectures and social events. It will take place virtually, organised and supported by the HBP Education Programme.

CALL FOR SUBMISSIONS

We invite original high-quality submissions describing innovative research in all disciplines addressed in the HBP. These contributions can emphasise theoretical or empirical works relating to a wide spectrum of fields including but not limited to: neuroscience, computer science, robotics, medicine, psychology, cognitive science or philosophy. We particularly encourage submissions with a potential to inspire collaboration in the research community by introducing new and relevant problems, concepts, and ideas, even if the work is at an early stage of development.

The conference will take place virtually over four days, with a versatile online schedule from 1 to 4 February 2021.

Participation in the 5th HBP Student Conference is open to the entire student community and early career researchers, regardless of whether they are affiliated with the HBP or not. Participants are also welcomed without contributing to the scientific programme. We encourage young scientists to register and aim at an equal gender representation.

Registration will be free of charge and open in September 2020.

Would you like to present your own work? Find further information on the abstract submission page.

Abstract submission deadline: 6 November 2020

Conference Programme Committee:

**Chairs:**
Alice Geminiani | University of Pavia
Ingrid Reiten | University of Oslo

**Committee:**
Petruţ Bogdan | The University of Manchester
Sandra Diaz | Forschungszentrum Jülich
Jens Egholm Pedersen | Royal Institute of Technology
Carmen Lupascu | Italian National Research Council
Alper Yegenoglu | Forschungszentrum Jülich

Organisers:
HBP Education Programme Office | Medical University Innsbruck
