person for **Ethical Rapporteurs of SP2 & SP3**

Henrik Walter, Prof. Dr med. Dr phil.

German psychiatrist, neurologist and philosopher

Formerly serving as Professor for Biological Psychiatry in Frankfurt (2004-2006) and Professor of Medical Psychology in Bonn (2006-2009), he was appointed in 2010 as the chair for Psychiatry, Psychiatric Neuroscience and Neurophilosophy at the Universitätsmedizin Charité Berlin, Germany and is Director of the Research Division of Mind and Brain within the Department of Psychiatry, where he also serves as medical vice-director (<http://mindandbrain.charite.de/en/>, henrik.walter@charite.de).

His research interests are focused on system neuroscience in psychiatry, cognitive neuroscience, imaging genetics, philosophy of mind and neurophilosophy.

He is author of about 300 publications, including > 180 original articles, a monograph on “Neurophilosophy of Free Will” (MIT 2001) and 6 edited books, amongst them the first German text book on “Functional Neuroimaging in Psychiatry” (2004) and an edited book (in German) on “From neuroethics to neurolaw? The beginning of a new debate” (2009). His view on “The third wave of biology psychiatry” can be found in *Frontiers in Psychology* (2013, 4:582).
