Expertise: Neuropharmacology, Basic Neuroscience, Ethics in Animal Research and Clinical Drug Trials

Contact person for **Ethical Rapporteurs of SP1 & SP3**

Melita Salkovic-Petrisic, Prof, Dr med, PhD

Croatian pharmacologists and basic neuroscientist

Employed at the University of Zagreb School of Medicine (Zagreb, Croatia) since 1983, where serving as Tenured Professor of Pharmacology since 2013. Postdoctoral imperfection: Babraham Institute (Neurobiol. Dept.), Cambridge, UK (1994-1995), Clinics and Policlinics for Psychiatry and Psychotherapy (Neurochem. Dept.), University of Wuerzburg, Germany (2003). Since 2004 she serves as member of the Professional Council of the Croatian Brain Research Institute (2004-) and the Ethical Committee for Laboratory Animal Procedures (2010-) at the Univ. Zagreb Sch. Med. She was appointed as a member of the Central Ethical Committee for clinical drug trial approval in Croatia at the Croatian Agency for Drugs and Medicinal Products (2005-).

Her research interests are focused on animal model of sporadic Alzheimer's disease as a platform for preclinical drug development studies. She is author/coauthor of about 40 original scientific papers, 48 textbook/manual chapters (4 on ethics), 50 preclinical and clinical drug overviews for drug marketing and 90 evaluations of drug development preclinical and clinical studies for drug clinical trial approval.
